ANDOR
an Oxford Instruments company

RoHS Policy

Declaration of Conformity in relation to:

Directive 2011/65/EU of the European Parliament and of the council of 8 June 2011 on the restriction of the use of certain hazardous substances in electrical and electronic equipment (Recast).

- Digital Cameras and accessories
- Spectrographs and accessories
- Microscopy Systems and accessories

The equipment detailed above is classified as category 9 equipment 'Industrial Monitoring and control instruments' as defined within Annex I and Article 3.24 (Scope) of the Directive 2011/65/EU.

As such as per Article 4.3 (Prevention) of the directive Article 4.1 does not apply to this equipment until 22 July 2017. Therefore, equipment placed on the market before the 22 July 2017 may legitimately contain substances listed in Annex II as restricted by the Directive 2011/65/EU.

Andor's Environment policy and commitment is to reduce its impact on the environment. As such Andor's plan is that all products and processes will be compliant with the RoHS recast directive no later than July 2016, one year ahead of the deadline required for industrial monitoring and control instruments.

On behalf of Andor Technology:

Gary Wilmot
Head of Engineering & Quality
